In-garage motorcycle storage area. 10 / 10

David was asked to create an in-garage motorcycle store by knocking through the back wall of the garage and into an under the stairs space which wasn't being used. His brief was to create the largest space possible which would then be fire-lined and made tidy. David arrived as promised/on time. Within the first hour he had encountered a slight problem (which was only evident once the back wall had been knocked through) with a poorly constructed staircase and several props in the way. David quickly overcame the problem and indeed discussed every stage of the job in detail as it progressed. I couldn't be happier with the end result..not only do I have a great motorbike storage area (big enough for the bike and loads of bike gear) but my stairs are now also better supported and secure. The job was completed on time and my garage was left clean and tidy. I would have no hesitation in asking David to do further work for me.

Outside chimney built. Log fire and fire place installed. Oak floors, doors, skirting boards and back moulds. Bi-fold doors fitted. 10 / 10

David and his team, Dan and Kev, completed a first class job. They were very professional, friendly and above all trustworthy. David was glad to guide us on design ideas and his expert opinion was always valued. The job was completed to a very high standard. We hope to use their services again in the near future.
