Double glazed 9 vertical sliding sash windows and 4 casement windows. The old windows removed and replaced, all rubbish removed from site. 10 / 10

Was told that the fitters would arrive just at 9am which they did. They started work immediately putting down dust sheets and the removing the upstairs sash windows. They didn't stop at all until 3:30 pm when all of those windows had been replaced, cleaned and finished. Over the next four days they worked through the house to replace all of the windows.

The casement windows seem to be pretty standard other than the extra extension horn on the top opening window, that matches the sash windows. They are well built solid and finished to a high standard.

But the sash windows made the job for us. They are as close to our original sashes which had been installed when the house was built in the early 1900s. They look good, again are well constructed, beautifully finished and have instantly improved the appearance of the house internally and externally.

They come with all the usual environmental certificates (A rated). We noticed the improvement in sound insulation immediately. We like the limiters on the bottom sash that stops them from being opened too far and the ability of the windows to tilt inwards for clearing. Stephen was a delight to work with. No hard sell and his quote was what we paid.

I can't recommend Energy Windows highly enough.
